Long term Plan 2024-2025 - Year 5

Learning Mindsets: Respect, Resilience and Responsibility					
Key Events/Parental Engagement					
Autumn 1	**Autumn 2**	**Spring 1**	**Spring 2**	**Summer 1**	**Summer 2**
Harvest	Jorvik Viking Centre Visit Pantomime Christmas celebration		World Book Day Science Week	Easter	Ripon Workhouse Museum Visit Fieldwork Fortnight (Geography) Sports Day
English (Writing, Reading, GPVS)					
Autumn 1	**Autumn 2**	**Spring 1**	**Spring 2**	**Summer 1**	**Summer 2**
Reading: Word reading and comprehension Grammar Punctuation Vocabulary Spelling and Phonics (as appropriate)					
Class Book: The Firework-Maker's Daughter - Phillip Pullman **Reading Skills:** Prediction Retrieval Language and Meaning Clarification Inference Summarising **Writing Genres:** **Review** - Fireworks Display and Volcanic eruption	Class Book: Odd and the Frost Giants - Neil Gaiman **Reading Skills:** Fluency Words in context Sequencing Linking of events Retrieval Inference Predictions Making comparisons **Writing Genres:** **Poetry** - Kenning poem **Instructions** - How to Carry Out a Viking Raid **Non-chronological report** - Vikings	Class Book: Spymaster - First Blood - Jan Burchett and Sara Vogler MacBeth - Shakespeare **Reading Skills:** Fluency Prediction Retrieval Inference Making comparisons Events links to meaning Clarification Summarising Words in context **Writing Genres:** **Persuasive Argument - Which of**	Class Book: Grimm Tales - Philip Pullman Charles Dickens: stories (History link) **Reading Skills:** Words in context Retrieval Clarification Inference Summarising Decoding and fluency Retrieval Words in contexts Prediction How language affects meaning Sequencing Summarising Making comparisons	

Explanation - How does a volcano erupt? **Persuasive Writing** - Living near a volcano **Writing skills:** Proofreading Word classes Fronted adverbials Subordination Informal/formal language Direct/Indirect speech Spelling Focus: RECAP Prefixes and suffixes -cious -tious -ious i spelt with y Homophones and near homophones	**Narrative Fantasy** - The Bear and the Hare **Writing skills:** Conjunctions Modal verbs Sentence structure Relative clauses Apostrophes Cohesive devices Sentence openers Spelling Focus: Silent letters Modal verbs -ment Adverbs of possibility and frequency Statutory Spelling words	Henry VIII's wives had it 'the worst'? Poetry- learn by heart, write poems and then write your own version of a poem - Macbeth Additional chapter Mystery narrative (Spymaster) Playscripts - MacBeth **Writing Skills:** Proofreading and make changes where needed Use of language suited to audience and purpose Establish viewpoint as the writer through commenting on characters and events. Parenthesis Spelling Focus: -ity suffixes (to create nouns) -ness suffix (to create nouns) -ship suffixes (to create nouns) Homophones and Near Homophones Words with or spelt as oor Words with or spelt as au Converting nouns/adjectives into verbs using -ate Converting nouns/adjectives into verbs using -ise Converting nouns/adjectives into verbs using -ify	**Writing Genres:** Newspaper report - Grimm Tales Deconstructing modern fairy tales - Three Little Pigs with a devised final chapter Playscripts - Charles Dickens Non-Chronological Report of Life as a Victorian Child **Writing Skills:** Modal verbs Commas for clarification Parenthesis Adverbials Sentence structure Cohesion Range of punctuation Subordination Relative clauses Direct/Reported speech Spelling Focus: Words containing the letter string 'ough' Adverbials of time Adverbials of place Words with an /ear/ sound spelt 'ere' Unstressed vowels in polysyllabic words Adding verb prefixes de- and re- Adding verb prefix over- Convert nouns or verbs into adjectives using suffix -ful

		Converting nouns/adjectives into verbs using -en		Convert nouns or verbs into adjectives using suffix -ive Convert nouns or verbs into adjectives using suffix -al	
Maths					
Autumn 1	**Autumn 2**	**Spring 1**	**Spring 2**	**Summer 1**	**Summer 2**
Number Sense and Fluency Range of problem solving and reasoning activities					
Place Value and Number Sense 5,6,7,8-digit numbers - Reading and writing - Counting in multiples of 10/100/1000 from various starting points - Identifying value of digits - Placing on number line - Partitioning - Manipulating value of digits within numbers - Ordering - Rounding to various degrees - Decimals to 2dp Roman numerals **Decimals** Decimal sequences **Addition and Subtraction** Add whole numbers with more than four digits and decimals	**Multiplication and Division** Multiplying and dividing by 10, 100, 1000 (Link to place value) Multiplying and dividing by multiples of 10, 100, 1000 using known facts **Fractions** Recap properties of 2D shape (see MTP) Find fractions equivalent to a unit fraction Find fractions equivalent to a non-unit fraction Recognise equivalent fractions Convert improper fractions to mixed numbers Convert mixed numbers to improper fractions Compare fractions less than one Order fractions less than one	**Multiplication and Division** Mental strategies Written methods Inverse operations **Fractions** Multiply fractions Find fractions of amounts Use fractions as operators **Decimals and Percentages** Decimals as fractions Thousandths Rounding decimals	**Decimals and Percentages** Compare and order decimals Understand percentages Equivalent FDP **Shape** RECAP 2D and 3D shape properties Measuring and drawing angles Triangles Quadrilaterals Regular/irregular **Area and Perimeter** Measure and calculate perimeter Calculate area of rectangles, compound shapes, irregular shapes	**Statistics** Reading charts Reading line graphs Understand two-way tables and timetables **Position and Direction** Coordinates Translation Reflection	**Negative Numbers** Number lines Calculating with negative numbers **Converting Units** Km, m, cm, mm Kg, g Units of time Imperial units **Volume** Calculate volume Estimate volume and capacity

Subtract whole numbers with more than four digits and decimals Round to check answers Inverse operations (addition and subtraction) Multi-step addition and subtraction problems Compare calculations Find missing numbers **Multiplication and Division** Multiples Common multiples Factors Common Factors	Compare and order fractions greater than one Add and subtract fractions with the same denominator Add fractions within one Add fractions with a total greater than one Add to a mixed number Add two mixed numbers Subtract fractions Subtract from a mixed number Subtract from a mixed number – breaking the whole				

Science					
Autumn 1	Autumn 2	Spring 1	Spring 2	Summer 1	Summer 2

Working Scientifically

During Years 5 and 6, pupils will be taught to use the following practical scientific methods, processes and skills through the teaching of the programme of study content:

- planning different types of scientific enquiries to answer questions, including recognising and controlling variables where necessary
- taking measurements, using a range of scientific equipment, with increasing accuracy and precision, taking repeat readings when appropriate
- recording data and results of increasing complexity using scientific diagrams and la- bels, classification keys, tables, scatter graphs, bar and line graphs,
- using test results to make predictions to set up further comparative and fair tests

- reporting and presenting findings from enquiries, including conclusions, causal relationships and explanations results, explanations of and degree of trust in results, in oral and written forms such as displays and other presentations

- identifying scientific evidence that has been used to support or refute ideas or arguments.

Animals including humans	Properties/changes of materials	Forces	Earth and Space	Living things and their habitats	Living Things (Y6 unit)
Focus Scientists: • Sigmund Freud (Created psychoanalysis) • Olive Guthrie Smith (physiotherapist) We will focus on the changes that human beings experience as they develop to old age. We will tackle some sensitive subjects including puberty and death. Children will learn about the life cycle of a human being. We will investigate the development of babies and compare the gestation period of humans and other animals. We	Focus Scientists: • Becky Schroeder (Inventor of the glow sheet) • Dr Nira Chamberlain (polymath/mathematician who studies applied mathematics in science) As a class, we will investigate different materials, their uses and their properties and learn how to classify and group materials based on these properties. We will use our knowledge gained from comparative and fair tests to give evidence for the particular uses of everyday materials	Focus Scientists: • Isaac Newton (Discovered gravity) • Rafsan Chowdhury (Mechanical Engineer) We will learn about balanced and unbalanced forces, gravity, friction and the use of mechanisms such as levers, gears and pulleys. We will investigate Isaac Newton and his discoveries about gravity. The children will look for patterns and links between the mass and weight of objects, using newton metres to measure the force	Famous Scientist: Galileo Focus Scientists: • Mai Jemison (Astronaut) • Dr Helen Mason (Solar scientist) • Katherine Johnson (mathematician and space scientist) We will be exploring the movement of the Earth and other planets in our solar system relative to the sun as well as the movement of the moon around the Earth. We will discover how, because of their spherical nature, rotation and orbit, the Sun appears to	Focus Scientists: • Malaika Vaz (National Geographic explorer) • Maria Sibylla Merian (naturalist) We will learn about the process of reproduction and the life cycles of plants, mammals, amphibians, insects and birds. The children will explore reproduction in different plants, including different methods of pollination and asexual reproduction. Disciplinary (Working	Famous Scientist: Carl Linnaeus Focus Scientists: • Carl Linneus (Naturalist and botanist) • Nazifa Tabassum (Microbiologist and Science Communicator) We will describe how living things are classified into broad groups according to similar observable characteristics, including micro-organisms, plants and animals. We will compare animals in these groups, identifying similarities and

will learn about the changes experienced during puberty and why these occur. **Disciplinary (Working Scientifically) Concepts:** • Observing and measuring • Recording data • Interpreting and communicating results **Scientific Enquiry Types:** • Observing over time • Research using secondary sources • Pattern seeking **TAPS Assessment Activity (ies):** • Growth Survey (Do)	including metals, wood and plastic. We will investigate dissolving, separating mixtures and irreversible changes and recognise how some materials can be separated across different states of matter (liquid, solid and gas). We will use a range of techniques in order to separate a range of materials such as sieving, filtering and evaporating. We will also learn about dissolving, mixing and changes of state in reference to reversible change. The children will then learn about irreversible changes, and participate in two exciting investigations to create new materials, including casein plastic and carbon dioxide. **Disciplinary (Working Scientifically) Concepts:**	of gravity. We will collaboratively investigate air and water resistance, participating in challenges to design the best parachute and boat. **Disciplinary (Working Scientifically) Concepts:** • Asking question • Making predictions • Setting up tests • Observing and measuring • Recording data • Interpreting and communicating results • Evaluating **Scientific Enquiry Types:**	move across the Earth's sky creating day and night. **Disciplinary (Working Scientifically) Concepts:** • Asking question • Setting up tests • Observing and measuring • Recording data • Interpreting and communicating results **Scientific Enquiry Types:** • Identifying, Classifying and grouping • Observing over time • Comparative and fair testing • Research using secondary sources • Pattern seeking **TAPS Assessment**	**Scientifically) Concepts:** • Recording data • Interpreting and communicating results • Evaluating **Scientific Enquiry Types:** • Identifying, Classifying and grouping • Observing over time • Research using secondary sources • Pattern seeking **TAPS Assessment Activity (ies):** • Life Cycles (Review) **Science Trails:** What are the similarities and differences between	differences. We will classify plants and animals based on characteristics and give reasons for our choices. **Disciplinary (Working Scientifically) Concepts:** • Asking question • Making predictions • Setting up tests • Observing and measuring • Recording data • Interpreting and communicating results • Evaluating **Scientific Enquiry Types:** • Identifying, Classifying and grouping

Science Trails: What can observing people in our local area tell us about the human life cycle?	• Asking question • Making predictions • Setting up tests • Observing and measuring • Recording data • Interpreting and communicating results • Evaluating **Scientific Enquiry Types:** • Identifying, Classifying and grouping • Observing over time • Comparative and fair testing • Research using secondary sources • Pattern seeking **TAPS Assessment Activity (ies):** • Nappies (Plan)	• Comparative and fair testing • Research using secondary sources • Pattern seeking **TAPS Assessment Activity (ies):** • Rocket Mice (Review) • Aquadynamics (Review) **Science Trails:** How can we see forces in action in everyday life?	**Activity (ies):** • Craters (Do) • Solar System research (Review) •	different types of flowering plants?	• Observing over time • Comparative and fair testing • Research using secondary sources **TAPS Assessment Activity (ies):** • Invertebrate research (Review) • Outdoor keys (Do) **Science Trails:** How can we find out about the animals that live in our school grounds?

	• Insulation Layers (Do) Dissolving (Plan)				
History					
Autumn 1	**Autumn 2**	**Spring 1**	**Spring 2**	**Summer 1**	**Summer 2**
Key Skills: Develop a chronologically secure knowledge and understanding of British, local and world history Establish clear narratives within and across the periods they study Note connections, contrasts and trends over time Develop the appropriate use of historical terms Address and devise historically valid questions about change, cause, similarity and different and significance Construct informed response involving thoughtful selection and organisation of relevant historical information Understand that our knowledge of the past is constructed from a range of sources					
Anglo-Saxons 450 AD and Vikings 793AD We will be using Anglo-Saxons and other tribes including the Scots and the Vikings to explore sources, discuss their reliability and think about how some can be open to interpretation. We will also be identifying key Anglo-Saxon and Viking events and putting them into chronological order - understanding sequence of key events and the duration of these. Finally, we will investigate the economic, cultural, social, political and environmental impact the Anglo-Saxons and Vikings had on our country. (environmental, political cultural, social history) **(NC: Britain's settlement by Anglo Saxons and Scots, the Viking and Anglo Saxon struggle for the Kingdom of England to the time of Edward the Confessor)** **Concepts:** chronology, significance, culture, change and continuity, cause and consequence, interpretation, sequence, duration **Strands:** economic, cultural development, political, environmental **Key Concepts-Disciplinary**		**Tudor Britain** In our learning, we will investigate how Tudor monarchs impacted upon economic, political, social, cultural, development of Britain. (social, economic, political, environmental history) We will construct informed responses that involve thoughtful selection and organisation of relevant historical information from a range of primary and secondary sources. We will be learning about the events that led to the reformation of the Catholic religion and the difference between life in the countryside and in the city. We will learn about the decisions that Elizabeth I had to make to enable a successful reign and determine the role of a good monarch during these times. We will also compare the lives of Elizabethans within different social classes to determine the quality of life during this period of time. (social, environmental, political, economic history)		**Victorians including the Industrial Revolution** We shall be investigating what life was truly like in the Victorian times as we consider why people moved from the countryside to the cities, the social conditions of cities including working in factories (social, economic, political, environmental history) and also life as a Victorian Child. Within our unit, we shall refer to primary and secondary sources to guide us in answering important questions such as

Chronology **Sequence** Recap on when the Romans left and when AS started to come to Britain Sequence key events affecting both societies **Similarities and Differences (same historical period)** Saxons and Vikings - farmers/warriors/women/children/slaves/laws/justice Old stone age **Historical Enquiry-Evidence and Sources** **Archaeological sites** **Contemporary accounts** **Reconstructions of longships/knarrs** Which was better stone bronze iron? **Change and Continuity-across periods** Investigate changes over time- homes, farming, tools, materials **Interpretation of History** Interpretation-interpreting and analysing a range of sources - images of AS how they are represented including myths and legends Film clips **Historical Terms** Use a wide vocabulary of historical terminology **Significance** Key people and events affecting both societies: King Arthur/Athelstan/Offa/Cnut	**(NC: a study of an aspect/theme in British History that extends pupils' chronological knowledge past 1066)** **Concepts:** Chronology, Significance, Sequence, Cause and consequence, Change and continuity **Strands:** Famous people, economic, social history, political, environmental		'What the Dickens was life like in a Victorian town?' We shall conclude our unit by asking if the Victorian era was a 'golden age' or 'dark age' as we refer to both primary and secondary sources from over the last 100 years. **(NC: a study of an aspect/theme in British History that extends pupils' chronological knowledge past 1066).** **Local study: Steel in Sheffield** In History, we will be doing a local study on the steel industry and its impact on Sheffield. (social history). We will start by tracing the history of steel throughout the 1900s and beyond. This will include the mining strikes across Sheffield, and what caused these as well as the impact of them. (environmental, political, social history) We will look at the significant

			women of steel and also how the steel industry is still prevalent today. (political, social, cultural history) (NC: A local history study beyond 1066) **Concepts:** Chronology, Significance, Sequence, Cause and consequence, Change and continuity **Strands:** Economic, social, political, environmental,

Geography

Autumn 1	Autumn 2	Spring 1	Spring 2	Summer 1	Summer 2

Skills

Develop a chronologically secure knowledge and understanding of British, local and world history
Establish clear narratives within and across the periods they study
Note connections, contrasts and trends over time
Develop the appropriate use of historical terms
Address and devise historically valid questions about change, cause, similarity and different and significance
Construct informed response involving thoughtful selection and organisation of relevant historical information
Understand that our knowledge of the past is constructed from a range of sources

Mountains and Volcanoes We will start by locating the continents and oceans on OS maps. We will use the maps and case studies to learn about mountains and natural disasters such as volcanoes. We will explore the geographical regions typical for volcanoes to form and	**Migration and Settlements** In order to better understand our History learning about Anglo Saxons and Vikings we will be learning about why people move from place to			**World Trade** We will start our learning by understanding how we are linked to people in other parts of the world and locating where the things we buy come from on a world map/globe. Then we will look at trade and how this affects people and places in different ways. We will look in particular at some popular consumer brands around the world and how these link people and places together. Transport will form our next part of

their identifying human and physical characteristics (such as settlement, land use, economic activity and accessibility to trade links) and explore what increases the likelihood of natural disasters in certain regions - linking this to tectonic places. We will also explore the impacts of the natural disasters on the country/city and how this affects their economic prospects and access to food, water and other essential resources. DEPTH STUDY - Humanitarian disasters/How can you adapt to survive living near volcanoes? Geographical Association scheme links: Mountains and volcanoes Finally, we will study our local area of Ecclesfield. We will create sketch maps of the physical and human landscape and how this has changed over time. We will also be practising our geographical skills of grid references, using a compass and reading symbols/keys. (NC: Locational Knowledge: locate the world's countries, environmental regions, latitude/longitude	place and how they have lived over the years. We will study the lines of longitude and latitude and discover how migration numbers have changed in recent years. Geographical Skills and fieldwork Understanding the social, economic, environmental, or political connections between places Exploring sustainable development and its impact on environmental interaction Concepts **Human processes** - What are the push and pull reasons for people to move place (city or country) **Environments** - What are the environmental factors forcing or encouraging people to migrate?			learning by exploring how the goods reach and leave the UK. After, we will explore the links between trade and the environment and the impact our everyday choices can make. DEPTH STUDY - Who is responsible for protecting the environment? Geographical association scheme links: World Trade (NC: Human and Physical Geog: describe and understand key aspects of physical geog: volcanoes and earthquakes, human geog: settlement and land use, types of settlements and land use, economic activity including trade links and the distribution of natural resources. Geographical skills and fieldwork: use maps, atlases, globes and digital/computer mapping to locate countries and describe features studied , use the eight points of a compass, four and six-figure grid references, symbols and key (including the use of Ordnance Survey maps) to build their knowledge of the United Kingdom and the wider world ,use fieldwork to observe, measure, record and present the human and physical features in the local area using a range of methods, including sketch maps and digital technologies.) **Geographical Enquiry** - How are we linked to other places in the world? What do we mean by a developing country? In what way are large countries like / unlike nation states? How does trade affect people and places around the world? What do we know about the geography of our food?

Human and Physical Geog: describe and understand key aspects of physical geog: volcanoes and earthquakes, human geog: settlement and land use, economic activity, Geographical skills and fieldwork: use maps, atlases, globes and digital/computer mapping to locate countries and describe features studied , use the eight points of a compass, four and six-figure grid references, symbols and key (including the use of Ordnance Survey maps) to build their knowledge of the United Kingdom and the wider world ,use fieldwork to observe, measure, record and present the human and physical features in the local area using a range of methods, including sketch maps and digital technologies.) **Geographical Enquiry -** What does a mountain look like? Where can mountains be found? How are mountains formed? What would you find under your feet? How are volcanoes formed? Can you describe how volcano features vary?				What is our food's history? Where does our food come from? Near or far? How is our food made? Is there enough food to go around? What is the future of our food? **Concepts:** **Disciplinary -** **Places -** Locations of where our clothes are made or come from. Materials and their locations. Maps to identify Apple - where products are manufactured. Repeat with food - loaf of bread for example. **Interconnections -** Clothes - where are these from? Importing and exporting materials. Why and where from? Life of a macbook/ipad - how does this travel through different countries? Food - loaf of bread. How has this got to the classroom? Track journey. **Human processes** - Developing countries, importing and exporting. Exploring Tesco - is Tesco like a country? Comparison of layout with UK. Impact of large companies upon world trade. Why are products produced on one side of the world and then sold somewhere else? Impact of manufacturing - positives and negatives for country. Air miles, fair trade etc. World hunger - discussion around how this problem can be solved.

Is there a pattern in the location of volcanoes? Why do people live near volcanoes? **Concepts:** **Disciplinary -** **Place** - Location of mountains/volcanoes in the world. Start with UK. Location of tectonic plates. **Physical processes** - How mountains/volcanoes are formed. Features of mountains/volcanoes, similarities and differences between mountains/volcanoes, Patterns of mountains/volcanoes? Tectonic places and how they connect to location of volcanoes. **Human processes** - Why live near them? Settlement and patterns. Reasons for and against living there **Environments** - describing the environment of a mountain. How can we tell on a map? How high above sea level?				

Art					
Autumn 1	Autumn 2	Spring 1	Spring 2	Summer 1	Summer 2
Collage/ mixed media Research: Robert Rauschenberg 		Drawing 		Painting  Research:	

What do the colours suggest? Emotions? Feelings? How was the artist feeling when he painted the piece? Why? What impact does the composition have? Developing skills: Layering a range of media – paint, magazines, pastels, chalk etc. What different effects can they create? Different compositions / colour choices? Experimentation with collage: https://classroom.thenational.academy/lessons/introduction-to-collage-and-experimentation-with-paper-cgvpcd?activity=video&step=1 Applying skills: Collage depicting a volcanic eruption in the style of Rauschenberg. Group piece. Evaluation: Each group to prepare their 'artist's intent' to go alongside their artwork. Other groups to assess whether they have achieved their intent and how they could have done it more effectively or differently. Formal Elements: Line Colour Tone shape space form texture	**Research**: Figurative artists and in depth research into Leonardo Da Vinci How has the human figure been a subject for many artists? How has the body been depicted in different ways? How has it been portrayed in sculpture, paint etc. Links to Y2 topic (Angel of the North; Henry Moore etc). Developing skills: Experiment creating different figures using a range of drawing materials (pen, chalk, pastels) Can they draw from memory or using their imaginations? Can the figures be in different positions? Explore relationships between line, shape, tone and texture NSEAD lesson: https://www.nsead.org/resources/units-of-work/uow-drawing-figures/ Applying skills: Drawing a Tudor portrait of Henry VIII's wives in proportion Evaluation: Class 'Art Gallery' What do you like about your work? How does your work compare to the work of others? Formal Elements: Line	**Edvard Munch** Focus on the feelings and emotions portrayed within the piece. How significant is the name? What does it suggest? Developing skills: Colour mixing Warm and cold colours Contrasting colours Testing different paints (water colour, acrylic, powder) Work from a variety of sources Colour mixing: https://classroom.thenational.academy/lessons/mixing-colours-workshop-68r62c?activity=video&step=1 Applying skills: Creating an image depicting the 'Industrial Revolution' using 'The Scream' as inspiration. How can children portray feelings and emotion within a painting? Evaluation: Self assessment Compare own piece with Edvard Munch What have we kept similar? Different? How emoticon is the piece? Why? Formal Elements: Line Colour Tone shape

Y5 RETRIEVAL PRACTICE AUTUMN TERM • I can experiment with cutting and ripping materials in different ways to create different effects • I can experiment with layering materials in different ways • I can experiment with adding other materials too **Following completion of Unit of Work (Collage Gaps):** • I can mix colours effectively • I can use my materials to create textures I can consider where I might stick my items for my intended purpose (considering foreground and background etc.)	Shape Form Tone **Y5 RETRIEVAL PRACTICE SPRING TERM** • I can confidently sketch lines and shapes based on what I have seen • I can create different tones and shades with different media • I can create different textures using hatching, cross-hatching, scumbling, stippling to create realistic effects • I can sketch using the rules of proportions (for a face)	space form texture **Y5 RETRIEVAL PRACTICE SUMMER TERM** • I can mix colours confidently • I can use different brushes to create different effects • I am confident in picking the correct brush for what I am painting • I can manipulate paint in different ways (to create washes and to create thickened paint) and for different purposes • I can experiment with hues, shades, tones and tints **Following completion of Unit of Work (Painting Gaps):** • I can mix colours confidently and understand when and why I might mix cool, warm, contrasting and complimentary colours • I can apply these skills to begin to portray feelings and emotions

Design and Technology					
Autumn 1	Autumn 2	Spring 1	Spring 2	Summer 1	Summer 2

Computer Control	Structure	Mechanisms - levers/cams and followers, gears
To design and make a Christmas celebration decoration with a light-up element which can be controlled via a computer. NC: understand and use electrical systems in their products [for example, series circuits incorporating switches, bulbs, buzzers and motors] apply their understanding of computing to program, monitor and control their products. **Skill retrieval from previous years:** Simple, parallel and series circuit, levers and sliders, strengthening and stiffening **Investigate, disassembly, evaluate:** • Look at the range and styles of cards available which light up and are moveable • Investigate design elements such as embossing/cutting etc **Focus Practical tasks:** • Investigate programming a crumble controller to light up the LED Sparkle https://www.youtube.com/watch?v=T8U_5Fxqtis&feature=youtu.be	**Design and make a bird hide for our school garden** NC: apply their understanding of how to strengthen, stiffen and reinforce more complex structures **Skill retrieval from previous years:** Free standing structures, shell structures, Levers and sliders **Investigate, disassembly, evaluate:** • Investigate and research purpose of bird boxes • Children research key events and individuals related to their study of frame structures e.g. Stephen Sauvestre - a designer of the Eiffel Tower; Thomas Farnolls Pritchard - designer of the Iron Bridge. They also learn about locally important design and technology activity related to their project. • Children investigate and make annotated drawings of a range of portable and permanent frame structures,	**To design and make a moving toy for a child.** NC: understand and use mechanical systems in their products [for example, gears, pulleys, cams, levers and linkages] **Skill retrieval from previous years:** Wheels and axles, pulleys, pneumatics, shell structures, frame structures **Investigate, disassembly, evaluate:** • Look at a variety of different toys/ structures which use Cams, gears, wheels and other mechanisms • Research investors and designers Linked to toy making **Focus Practical tasks:** • Investigate the shape of cams and the difference this has on the movement.

• Create circuits that employ a number of components (such as LEDs, resistors and transistors). **Design**: • Generate ideas through brainstorming and identify a purpose for their product • Draw up a specification for their design • Develop a clear idea of what has to be done, planning how to use materials, equipment and processes, and suggesting alternative methods of making if the first attempts fail **Make** • Using techniques learn, children to make their electrical celebration card which can be controlled via scratch • Select appropriate materials, tools and techniques Use skills in using different tools and • Cut and join with accuracy to ensure a good-quality finish to the product • Create circuits that employ a number of components (such as LEDs, resistors and transistors).	**Focus Practical tasks:** • Use a construction kit consisting of plastic strips and paper fasteners to build 2-D and 3D frameworks. Compare the strength of square frameworks with triangular frameworks. • Demonstrate how paper tubes can be made from rolling sheets of newspaper diagonally around pieces of e.g. dowel. Ask children to use these tubes and masking tape or paper straws with pipe cleaners to build 3-D frameworks such as cubes, cuboids and pyramids. *How could each of the frameworks be reinforced and strengthened?* • Develop skills and techniques using junior hacksaws, G-clamps, bench hooks, square section wood, card triangles and hand drills to construct wooden frames, as appropriate. • Demonstrate skills and techniques for accurately joining framework materials together e.g. Creating frame structures using paper straws, square sectioned wood. Test the strength and functionality of different frame structures Compare frame structures with free standing structures and shell structures	Make a simple Cam to control movement within an object. • Investigate how gears support movements • Compare different mechanisms and their functionality • Investigate how to join materials using appropriate methods. Use a hand drill to drill tight and loose fit holes. **Design** **Use what they have learnt to design a moving toy** • Communicate their ideas through detailed labelled drawings • Generate ideas through brainstorming and identify a purpose for their product • Draw up a specification for their design • Develop a clear idea of what has to be done, planning how to use materials, equipment and processes, and suggesting alternative methods of making if the first attempts fail • Use results of investigations, information sources, including ICT when developing design ideas

Evaluate • Evaluate their products, identifying strengths and areas for development, and carrying out appropriate tests • Record their evaluations using drawings with labels • Evaluate against their original criteria and suggest ways that their product could be improved	**Design:** • Children should be encouraged to generate innovative ideas, drawing on their research. Ask children to develop a simple design specification to guide their thinking. • Children should produce a detailed, step-by-step plan, listing tools and materials. • Children's sketches should be annotated with notes to help develop and communicate their ideas. **Make** Formulate a clear plan, including a step-by-step list of what needs to be done and lists of resources to be used. • Competently select from and use appropriate tools to accurately measure, mark out, cut, shape and join construction materials to make frames. • Use finishing and decorative techniques suitable for the product they are designing and making	**Make** • Make a moving toy for a child • Make appropriate design decisions throughout the making • Utilise different mechanisms to ensure the product is fit for purpose • Select appropriate tools, materials, components and technique • Assemble components make working models • Make modifications as they go along • Use skills in using different tools and equipment safely and accurately **Evaluate** • Evaluate a product against the original design specification • Evaluate it personally and seek evaluation from others against the original criteria and suggest ways it can be improved.

	Evaluate • Critically evaluate their products against their design specification, intended user and purpose, identifying strengths and areas for development, and carrying out appropriate tests.	

Music					
Autumn 1	**Autumn 2**	**Spring 1**	**Spring 2**	**Summer 1**	**Summer 2**
Ukulele - Fly With The Stars *Fly with the stars* is the second song in a 4-part series of songs for the purposes of learning ukulele with primary-aged pupils. If this is your first time working with the instrument, you might prefer to begin with Play Ukulele 1: *Latin dance*. *Fly with the stars* is based on a verse/chorus structure using A	**Music Technology - Hip Hop** In this unit, your students will learn to arrange and mix their own Hip Hop compositions using YuStudio, Charanga's online music studio. Create with YuStudio's Hip Hop Project is one of a series of projects introducing pupils to the creative possibilities of our DAW. They will be taught and mentored by	**What Shall We Do With The Drunken Sailor?** *What shall we do with the drunken sailor?* is a type of song called a sea shanty. Sailors would likely have sung this song while hauling up the sail or the anchor on seafaring vessels. As well as providing an opportunity to find out more about the context, history, and purpose of sea	**Why We Sing** This listening unit is based around the Gospel song *Why we sing* by Kirk Franklin. The song originally comes from the album *Kirk Franklin and the Family* from 1993, however this activity is based around a live video recording from inside a church, with a congregation. The video is a good starting point for talking about the	**Introduction to Songwriting** Songwriting can sometimes appear daunting. This unit of work aims to give some straightforward starting points and simple ideas to help children feel confident about creating their own songs. **Musical focus:** Structure (verse/chorus), hook, lyric writing, melody. children will be able to:	**Glockenspiel** During this unit children will be introduced to tuned percussion playing and stick/beater technique. Childr en will learn to understand how musical notation works, recognising notes on a staff and understanding note lengths (semibreves, minims, crotchets and quavers). Each lesson will introduce the children to a different genre of

minor and C major chords in an electronic dance style, and begins with just two notes – the notes C and A – allowing pupils to get playing quickly. During the unit, which could last between half and a whole term, pupils will develop their playing skills, begin to recognise aurally, and in notated form, the notes C, D, E (do, re, mi) and use them to compose with.	leading artists and practitioners. By the end of the series, students will have learnt invaluable skills in music production that will enrich their musical journeys and inspire their creativity, inside and outside the classroom.	shanties as work songs, the activities in this unit provide inspiration for pupils to create rhythm games (possibly for younger pupils to learn) and a class arrangement using their voices and instruments. This unit also contains the first of three progression snapshots that will be returned to and developed in Terms 2 and 3 to collect evidence of pupils' progress. **Musical focus**: Sea shanties, beat, rhythm, chords, bass, dot notation, progression snapshot 1. **Pieces:** *What shall we do with the drunken sailor?*	places where we make music, and the differences between performing for an audience and singing as a part of worship or celebration. Activity in the unit will explore other examples of Gospel music and gives opportunities for developing singing in a Gospel style. **Musical focus:** Gospel music, instruments, structure, texture, vocal decoration. **Piece:** *Why we sing* by Kirk Franklin. children will be able to: Recognise individual	Improvise and compose, 'doodling' with sound, playing around with pitch and rhythm to create a strong hook. Create fragments of songs that can be developed into fully-fledged songs. Listen and appraise, identifying the structure of songs and analysing them to appreciate the role of metaphor. Understand techniques for creating a song and develop a greater understanding of the songwriting process.	music and give them the opportunity listen and appraise each one, identifying the key features. Each lesson will give the children the opportunity to play along, improvise and compose using the glockenspiel to each genre of music. Children will be able to: Hold beaters and instruments confidently, achieving a good tone from the instruments. Recognise, play and write Middle C, D, E, F, G, A, B, C using musical notation.

		Most children will be able to: Compose body percussion patterns to accompany a sea shanty. Write these out using rhythm grids. Keep the beat playing a 'cup' game. Sing a sea shanty expressively, with accurate pitch and a strong beat. Sing in unison while playing an instrumental beat (untuned). Play bass notes, chords, or rhythms to accompany singing. Talk about the purpose of sea shanties and describe some of the features using music vocabulary.	instruments and voices by ear. Listen to a selection of Gospel music and spirituals and identify key elements that give the music its unique sound. Talk about pieces using music vocabulary (e.g. the ways the voices are used, the contrasting texture of solo voice and choir, singing in harmony, the lyrics etc.) Develop and practise techniques for singing and performing in a Gospel style.		

Harvest Festival singing performance	Christmas repertoire performance video to be shared with parents.	Spring showcase for children in school.	Spring performance video to be shared with parents including opportunities for small groups and possible solo performances.	Reflect Rewind and Replay - children to select their favourite songs from the year and perform for children at Coit.	End of year performance for parents including opportunities for small groups and possible solo performances.

0.5 - Key Skills Becoming an Efficient Computer User This unit is not meant to be taught as a standalone piece of work. It is ideally taught at the start of the year alongside whichever computing unit is most appropriate or as part of the wider curriculum. These are the key skills that will help pupils to use technology appropriately and effectively. This will enable pupils to use computers	4.5 How do I program a physical system? (Link to DT Computer Control Unit) Recognise that we use selection to change what happens in a program, depending on whether a condition is met; design and create programs using selection and infinite loops; recognise and use simple variables to keep score. CONCEPTS: Input, repetition, selection, variable	1.5 How do we collaborate online? Understand that the World Wide Web is the collection of information on the network of computers around the world called the Internet. I can use Internet services to share information with others. CONCEPTS: Why we use computers; creating content; editing content; multimedia - text, image, audio, video; copyright;	Review: Design a questionnaire and collect data (Y4) Choose appropriate formats to present and convey information (y4) 3.5 How do I find and share data safely and responsibly? CONCEPTS: Computer; software/hardware; personal information; information/data; Internet; World Wide Web; search engine; database; terms & conditions; digital	5.5 How do I use variables to score in program? (Link to DT Computer Control Unit) Recognise examples of physical systems controlled by computers; name a range of inputs and outputs of physical systems; use repetition, selection and variables to build or simulate a physical system in a suitable application. CONCEPTS: Input, output, repetition,	2.5 How do I communicate using audio effectively? To combine audio and other media to communicate information effectively. CONCEPTS: Computer; software/application; creating & editing content; podcast/audio; copyright; personal information; analogue/digital KNOWLEDGE: Features of a good podcast; why we use computers;

more independently in order to enhance learning in the wider primary curriculum, which will ultimately save time and effort for both pupil and teacher. Entering: Pupils can open and save a file to a suitable folder, and use suitable file names when saving work. They understand that school computers can be connected and they may use a shared area for saving work. They type using all fingers. Pupils use a search engine to find information using keyword searches. Developing: Pupils understand that you can organise files using folders, and can delete, move	**DECLARATIVE KNOWLEDGE:** We use selection to change what happens in a program depending on if a condition is met; we need to use an infinite loop to keep checking if a condition is met throughout a program. Variables are bits of data stored in program that can change according to what happens. **PROCEDURAL KNOWLEDGE:** Create a program with different outcomes depending on what happens as it runs; plan an algorithm away from the computer then test out; debug more complex programs. Create a variable in Scratch and	Internet; World Wide Web; personal information; digital footprint. KNOWLEDGE: Different ways to collaborate online; range of web browsers; what a URL is; history of the WWW; safe use of online technologies; who owns digital content; key features of a blog/wiki/webpage. SKILLS: Keyboard and mouse skills; evaluate reliability of a webpage; use key tools in given software; evaluate and improve a piece of work according to criteria. Entering: Pupils evaluate existing and their own digital content and edit	footprint KNOWLEDGE: Why we use computers; awareness of what data we share online; difference between the Internet & World Wide Web; how search engines work; not all information on the Internet is reliable SKILLS: Mouse & keyboard skills; use technology safely and responsibly; search for information effectively online Entering: Pupils understand that the Internet is made up of computers from all around the world connected together, and we can use it to share information. They understand that we use a web browser to access information stored	selection, variable, physical systems **DECLARATIVE KNOWLEDGE:** Physical systems have a range of inputs and outputs, including sensors; common sensors; we can use a flowchart to represent a physical system; how to combine loops, selection statements and variables to simulate simple physical systems. **PROCEDURAL KNOWLEDGE:** Create a program including different inputs and outputs; decompose a program and write an algorithm for each part; test, evaluate and debug more complex programs. Entering: Pupils use repetition to make programs more efficient.	digital content is owned by the person who created it; simple editing tools to improve content; importance of planning out content; where to find copyright free content SKILLS: Use a microphone/tablet to record audio; mouse skills; editing audio clips; layering audio clips for effect Entering: Pupils evaluate existing and their own digital content, and edit it to improve it according to feedback. They design and create digital content for a specific purpose. They edit existing digital content to make a new version with an awareness of

and copy files. They use right-click, left-click and double-click appropriately on a mouse. Pupils use a search engine to find specific information, and know how to copy text and images from a web page or document into another document. Secure: Pupils use the keyboard confidently to type at a suitable pace, and can use common keyboard shortcuts, e.g. Ctrl + C (copy); Ctrl + V (paste). They create and use a strong password where appropriate. They organise their files using folders and appropriate file names.	name it meaningfully. Developing: Pupils use forever loops and selection (if...then...) in a program. They decompose a problem and create a solution (sub-routine) for each step. They use procedures in programs to create a sub-routine. Pupils create a program using a range of events/inputs to control what happens. Secure: Pupils predict what will happen in a program or algorithm (e.g. change of output) when the input changes (e.g. sensor, data or event). They create programs including repeat	their own content to improve it according to feedback. They edit existing digital content to make a new version with an awareness of copyright. They understand that the Internet is made up of computers from all around the world connected together and that not all information found online is true.* Pupils understand that people can give permission for others to use their pictures.* Pupils understand that when we share content online, we might not be able to delete it.* Developing: Pupils collect, organise and present information	on the Internet. They know different ways of reporting unacceptable content and contact online.* They understand when to share personal information and when not to.* Pupils recognise what kind of websites are trustworthy sources of information.* Developing: Pupils understand that school computers are connected together in a network. They understand the difference between the Internet and the World Wide Web, and between a search engine and a web browser. They are aware that some people lie about who they are online, and recognise the	They predict the outcome of a block-based program, and can remix and change an existing program. They plan out programs using by writing algorithms. They use forever loops in a program Developing: Pupils create a program using a range of events/inputs to control what happens. They use selection in algorithms and programs, i.e. if... then... They can decompose a problem and create a solution (sub-routine) for each part. Pupils recognise variables in a program. Secure: Pupils predict what will	copyright. Pupils understand that people can give permission for others to use their content e.g. using Creative Commons.* Developing: Pupils collect, organise and present information effectively using a range of media. They use more complex tools to edit and enhance media for a particular effect. Secure: Pupils identify and use appropriate hardware and software to fulfil a specific task. They remix and edit a range of existing and their own media to create content. They recognise the audience

Concept: Machine Logic Online Safety Links: C3 Passwords Review: Explain when to use forever loops (Y4) Recognise selection in algorithms to alter what happens (Y4) Recognise common mistakes in programs and how to correct them (Y4)	until loops and recognise variables in a program.	effectively using a range of media. They design and create digital content for a specific purpose. Pupils collaborate with peers using online tools, e.g. blogs, Google Drive, Office 365. They understand that we use a web browser to access information stored on the Internet. They recognise what kind of websites are trustworthy sources of information and the benefits and risks of different apps and websites.* Secure: Pupils select, combine and use Internet services to fulfil a purpose. They recognise the audience when designing	benefits and risks of different apps and websites.* Pupils demonstrate responsible use of online services and technologies, and know a range of ways to report concerns.* Secure: Pupils understand the difference between physical, mobile and wireless networks. They can explain the difference between the World Wide Web and the Internet. They understand the basics of how search engines work, and that different search engines may give different results. Pupils perform complex searches for information using advanced settings in search engines.	happen in a program or algorithm (e.g. change of output) when the input changes (e.g. via sensor, data or event). They create programs including repeat until loops. They create simple variables, e.g. to keep score or remove lives in a game and understand the difference and use if... then... and if... then... else... statements.	when designing and creating digital content. Pupils know where to find copyright free images and audio, and why this is important.* Online Safety Links: C4: Copyright

		and creating digital content. They understand the difference between the Internet and the World Wide Web and the benefits of using technology to collaborate with others. They are aware of a range of Internet services, e.g. email, VOIP (Voice Over Internet Protocol e.g. Skype, FaceTime), World Wide Web, and what they do. They recognise the audience when designing and creating digital content. Pupils demonstrate responsible use of online services and technologies, and know a range of ways to report concerns.* They critically evaluate websites	They critically evaluate websites for reliability of information and authenticity.* They become increasingly savvy online consumers: know that algorithms are used to track online activities with a view to targeting advertising and information.* Online Safety Link S1: Control and Consent C2: Personal Information, Terms and Conditions N3: Verifying Information online

OAA (School Plan) The children will use maps to familiarise themselves with keys, symbols and the area around school. They will walk around the site to recognise the mpa. The children will work in groups to use a map to find control points around	**Dance (GS4PE)** Pupils learn different styles of dance, working individually, as a pair and in small groups. In dance as a whole, pupils think about how to use movement to explore and communicate ideas and issues, and their own feelings and thoughts. As they work, they develop an awareness of the historical and cultural origins of different dances. Pupils will be provided with the opportunity to create	**Basketball (GS4PE)** Pupils will develop key skills and principles such as defending, attacking, throwing, catching, dribbling and shooting. Pupils will learn to use attacking skills to	**Athletics (GS4PE)** Pupils are set challenges for distance and time that involve using different styles and combinations of running, jumping and throwing. As in all athletic activities, pupils think about how to achieve their	**Cricket (GS4PE)** Pupils develop the range and quality of striking and fielding skills and their understanding of cricket. They learn how to play the different roles of bowler, wicket keeper, fielder and batter. In all games activities,	**Tennis (GS4PE)** Pupils develop their competencies in racket skills when playing Tennis. They learn specific skills such as a forehand, backhand, volley and underarm serve. Pupils are given opportunities

school. They will compete in different challenges to discover the best ways to find all the orienteering points. **Key Skills:** working as a team, reading a map **Key Concepts:** • Movement • Coordination • Collaboration Sequence	and perform their work. They will be asked to provide feedback using the correct dance terminology and will be able to use this feedback to improve their work. Pupils will work safely with each other and show respect towards others. **Key Skills**: Performing actions, using canon, unison, formation, dynamics, character, structure, space, emotion, matching, mirroring, transitions **Key Concepts:** • Movement • Balance • Coordination • Collaboration • Sequence • Evaluation and improvement	maintain possession as well as defending skills to gain possession. Pupils will be encouraged to work collaboratively to think about how to use skills, strategies and tactics to outwit the opposition. They develop their understanding of the importance of fair play and honesty while self managing games, as well as developing their ability to evaluate their own	greatest possible speed, height, distance or accuracy and learn how to persevere to achieve their personal best. They learn how to improve by identifying areas of strength as well as areas to develop. Pupils are also given opportunities to lead when officiating as well as observe and provide feedback to others. In this unit pupils learn the following athletic activities: running over longer distances,	pupils have to think about how they use skills, strategies and tactics to outwit the opposition. In cricket, pupils achieve this by striking a ball and trying to deceive or avoid fielders, so that they can run between wickets to score runs. Pupils are given opportunities to work in collaboration with others, play fairly demonstrating an understanding of the rules, as well as being respectful of the people they	to work cooperatively with others and show honesty and fair play when abiding by the rules. Pupils develop their tactical awareness, learning how to outwit an opponent. **Key Skills:** Forehand groundstroke, backhand groundstroke, forehand volley, backhand volley, underarm serve **Key Concepts:** • Movement • Balance • Coordination

		and others' performances. **Key Skills**: Throwing, catching, dribbling, intercepting, shooting **Key Concepts:** • Movement • Balance • Agility • Coordination • Competition • Collaboration • Fairness • Technique	sprinting, relay, long jump, triple jump, shot put and javelin. **Key Skills:** Pacing, sprinting, relay changeovers, jumping for distance and height, push and pull throw for distance Key Concepts: • Movement • Agility • Balance • Coordination • Fitness • Technique • Evaluation and improvement	play with and against. **Key Skills**: Underarm and overarm throwing, catching, over and underarm bowling, batting, long and short barrier **Key Concepts:** • Agility • Coordination • Competition • Fairness • Technique	• Competition • Collaboration • Technique
Netball (GS4PE)	Fitness (GS4PE)	Gymnastics (GS4PE)	Tag Rugby (GS4PE)		Sports Day Practice

Pupils will develop defending and attacking play during evensided 5-a-side netball. Pupils will learn to use a range of different passes to keep possession and attack towards a goal. Pupils will be encouraged to work collaboratively to think about how to use skills, strategies and tactics to outwit the opposition. They will start to show control and fluency when passing, receiving and shooting the ball. They will learn key rules of the game	Pupils will take part in a range of fitness challenges to test, monitor and record their data. They will learn different components of fitness including speed, stamina, strength, coordination, balance and agility. Pupils will be given opportunities to work at their maximum and improve their fitness levels. They will need to persevere when they get tired or when they find a challenge hard and are encouraged to support others to do the same. Pupils are asked to recognise areas in which they make the most improvement using the data they have collected. **Key Skills:** Agility, balance, coordination, speed, stamina, strength, power **Key Concepts:** • Movement	Pupils create longer sequences individually, with a partner and a small group. They learn a wider range of actions such as inverted movements to include cartwheels and handstands. They explore partner relationships such as canon and synchronisation and matching and mirroring. Pupils are given opportunities to receive and provide	Pupils will develop key skills and principles such as defending, attacking, throwing, catching, running and dodging. When attacking, pupils will support the ball carrier using width and drawing defence. When defending, pupils learn how to tag, how to track and slow down an opponent, working as a defensive unit. They will play collaboratively in both uneven and then even sided games. Pupils will be encouraged to think about		Children will practise races such as sprints, skipping, egg and spoon, and the sack race. Pupils will be ranked into seats so they are racing against children of similar ability. The children will also practise team work by taking part in team challenges. **Key Skills:** Running, throwing, catching, teamwork **Key Concepts:** • Movement • Agility

such as footwork, held ball, contact and obstruction. Pupils also develop their understanding of the importance of fair play and honesty while self managing games. **Key Skills**: Passing, catching, footwork, intercepting, shooting **Key Concepts:** • Movement • Agility • Coordination • Competition • Collaboration • Technique	• Balance • Agility • Coordination • Fitness • Sequence • Evaluation and improvement	feedback in order to make improvements on their performances. In Gymnastics as a whole, pupils develop performance skills considering the quality and control of their actions. **Key Skills:** Symmetrical and asymmetrical balances, straight roll, forward roll, backward roll, straddle roll, cartwheel, bridge, shoulder	how to use skills, strategies and tactics to outwit the opposition. They develop their understanding of the importance of fair play and honesty while self managing games, as well as developing their ability to evaluate their own and others' performances. **Key Skills:** Throwing, catching, running, dodging, tagging, scoring **Key Concepts:** • Movement • Balance		• Coordination • Competition • Collaboration • Fairness Technique

		stand, handstand **Key Concepts:** • Movement • Balance • Agility • Coordination • Collaboration • Sequence • Technique	• Agility • Coordination • Competition • Collaboration

Autumn 1	**Autumn 2**	**Spring 1**	**Spring 2**	**Summer 1**	**Summer 2**
Phonetics lessons 1-3 (XT) In these three sequential lessons, pupils will learn a selection of the key phonemes to facilitate accurate and authentic pronunciation as part of their language learning experience. **My Family (IN)** By the end of this unit pupils will have the knowledge and skills to make a presentation about their own / a fictitious family in both spoken and written form in French. Pupils will	**The Date (IN)** Days of the week, months of the year and numbers 1-31 will be introduced, revised and consolidated, so, by the end of this unit, pupils will have the knowledge and skills to say the date and when their birthday is in French.	**What is the Weather? (IN)** By the end of this unit pupils will have the knowledge and skills to describe the weather and to also present a weather forecast pretending for television. This enables us to link the weather vocabulary with map work, compass points and general geography. This unit improves both language and cultural knowledge.	**Do You Have a Pet? (IN)** By the end of this unit pupils will have the knowledge and skills to present both orally and in written form about the pets they have and/or do not have in French. They will move from 1st person singular to 3rd person singular verb usage so they are able to say what the pet is called and use conjunctions more confidently.	**My Home (IN)** During this unit pupils will gain the knowledge and skills to present both orally and in written form about where they live and which rooms they have and do not have in their homes in French. This is a unit that focuses on recycling previously learnt grammar, using it with new vocabulary, conjunctions and grammar, demonstrating a growing ability to create independent responses.	**Habitats (IN)** By the end of this unit pupils will have the knowledge and skills to present both orally and in written form about various plants and animals that live in five very different habitats in French. This is one of the first units to encourage slightly more complex and sophisticated writing using a wider range of vocabulary.

start to integrate previously learnt language with newly acquired language, encouraging more confident use of their growing bank of vocabulary. Pupils will demonstrate an increasing knowledge of grammar and how to manipulate language, thus starting to create more personalised responses as the unit supports the change from 1st person singular to 3rd person singular.
