

# Subject Overview: Computing

2024 - 2025

	Autumn 1	Autumn 2	Spring 1		Spring 2	Summer 1	Summer 2
FS	<p><b>We Control technology</b></p> <p>Ia - What is a Computer? Ib - We Control Technology Ic - Tinkering: Bee-Bots</p> <p>This strand supports the EYFS educational programme for Understanding the World by helping children to foster their understanding of a technological diverse world. In addition it prepares the children for learning Computational Thinking skills in KSI.</p> <p><b>Online Safety Links:</b> Online Safety &amp; Digital Literacy Sleep (L1) - understand that screen time can affect sleep. Choosing what to do online (L2) - deciding on what is appropriate to watch and play online. Communicating online (S1) - how do they use technology to communicate? Feeling Safe (S2) - what to do if they see something they don't like. Personal Information (S3) - understand that some information is private, and shouldn't be shared.</p>		<p><b>Communication Multimedia</b></p> <p>2a - Digital Art 2b - Sound &amp; Music 2c - Photographs 2d - Films &amp; Animation 2e - eBooks</p> <p>This strand encourages the use of technology to support literacy and in other subject areas such as music and art.</p> <p><b>Online Safety Links:</b> Online Safety &amp; Digital Literacy Feeling Safe (S2) - what to do if they see something they don't like. Personal Information (S3) - understand that some information is private, and shouldn't be shared Choosing what to do online (L2) - deciding on what is appropriate to watch, listen to and play online. Sleep (L1) - understand that screen time can affect sleep. Choosing what to do online (L2) - deciding on what is appropriate to watch and play online.</p>		<p><b>Communication Data</b></p> <p>3a - Counting 3b - Sorting</p> <p>This strand demonstrates how technology can be used to support numeracy, and prepares pupils for working with data in Computing in KSI.</p> <p><b>Online Safety Links:</b> Online Safety &amp; Digital Literacy Feeling Safe (S2) - what to do if they see something they don't like. Personal Information (S3) - understand that some information is private, and shouldn't be shared.</p>		
Year 1	0.1 What is a computer	1.1 How do I use computer independently	Online safety	2.1 How do I use pictures and sounds?	4.1 Simple BeeBot Programs	3.1 How do I present data using pictures?	5.1 What is an algorithm?

<b>Vocabulary</b>

Order	Sequence								

<p><b>Unit 0.1</b> <b>What is a computer?</b> <b>Entering:</b> Pupils use a range of digital devices and understand that you can access content on a digital device. They use a mouse, touchscreen or appropriate access device to target and select options on screen.</p>	<p><b>1.1</b> <b>How do I use school technology independently?</b> Understand that a computer is a type of machine and we use computers to help us find out and present information <b>CONCEPTS:</b> What is a computer; hardware; software; creating content; personal information <b>KNOWLEDGE:</b> Why we use a computer to write; basic icons and where to</p>	<p><b>Online Safety Links:</b> C2: What is the internet <b>Online Safety Links</b> sl: Personal Information</p>	<p><b>Unit 2.1</b> How do I use sounds and pictures Use technology purposefully to create, organise, store, manipulate and retrieve digital content. Use technology safely and respectfully, keeping personal information private; identify where to go for help and support when they have concerns about content or contact on the internet or other online technologies <b>CONCEPTS:</b> Computer; software/application; creating &amp; editing</p>	<p><b>4.1</b> What is an algorithm? Recognise that program is a sequence of instructions that a computer can follow. Predict the outcome of simple programs, and start to plan out simple programs to move a floor robot. <b>CONCEPTS:</b> Computer; program; debugging <b>DECLARATIVE KNOWLEDGE</b></p>	<p><b>Unit 3.1</b> How do I present data using pictures? Use technology purposefully to create, organise, store, manipulate and retrieve digital content. Use technology safely and respectfully, keeping personal information private <b>CONCEPTS:</b> Computer; software/application; personal information; information &amp; data; chart/pictogram <b>KNOWLEDGE:</b> We can present data in charts; different kinds of charts and pictograms; key</p>	<p><b>5.1</b> What is a program? Recognise that an algorithm is a sequence of instructions that a human or computer can follow to complete a task. Create simple programs using floor robots by planning out an algorithm first. Debug and predict the outcome of simple programs and algorithms. <b>CONCEPTS</b> Computer; algorithm ;</p>
---	--	---	--	--	--	---

<p><b>Developing:</b> Pupils recognise a range of digital devices, and the basic parts of a computer or tablet, e.g. mouse, keyboard, screen. They understand that you can access the same content on different devices and that information can be stored on a computer. They can add text to a document using the keyboard (where appropriate).</p>	<p>find options in menus in word-processing software; where to open and save work at school; how to edit text and why we use particular effects (e.g. bold, underline); why we need to keep personal information private.</p> <p><b>SKILLS:</b> Logging on; Mouse skills - left, right, double click, targeting; keyboard skills - simple typing, basic keys; open and save documents highlight text and change appearance; insert an image</p> <p><b>Entering:</b> Pupils use technology to explore and access digital content. They create simple digital content, e.g. add basic text to a document that is already open.</p>		<p>content; multimedia - text, image, audio, video; copyright; personal information</p> <p><b>KNOWLEDGE:</b> A range of devices that can take digital photos/record audio or create art; (photos can be edited to alter them); why we use computers; where to open and save work at school; what makes a good photo/piece of art; digital content is owned by the person who created it; what to do if they see an upsetting image online</p> <p><b>SKILLS:</b> Use a camera/microphone/tablet to record audio and take photos OR use basic features of a digital art program to create art</p> <p><b>Entering:</b> Pupils use technology to explore and access digital content. They operate a digital device with</p>	<p>: Humans control computers by giving them instructions; what each button does o Bee Bot; the instructions we give to a Bee Bot is called a program.</p> <p><b>PROCEDURAL KNOWLEDGE:</b> Create a simple program to control a floor robot; predict the outcome of simple programs.</p> <p><b>Entering:</b> Pupils explore technology and try alternative approaches to achieve a goal. They understand that we control computers and can follow instructions to control a digital device. They can order the steps of a known task, and</p>	<p>features of a chart/pictogram; why we use computers; who to share personal information with</p> <p><b>SKILLS:</b> Mouse &amp; keyboard skills; collecting data; open and save documents; create a simple pictogram; answer questions about data shown in a pictogram or chart</p> <p><b>Entering:</b> Pupils sort familiar objects into one or more categories. They collect simple data (e.g. likes/dislikes) on a topic and answer basic questions about information displayed in images, e.g. more or less. They can present simple data using images. Pupils are aware that information can be public or private.*</p> <p><b>Developing:</b> Pupils can recognise</p>	<p>program; debugging</p> <p><b>DECLARATIVE KNOWLEDGE</b></p> <p>An algorithm is a set of instructions that can be followed by a human or a computer to achieve a task; an algorithm inputted on a computer is called a program; identifying and correcting errors is called debugging. The order of instructions in a program/algorithm is important.</p> <p><b>PROCEDURAL KNOWLEDGE:</b> Create a simple program to control a floor robot ;plan an algorithm away from the computer then</p>
---	--	--	---	---	--	--

<p>Pupils understand that information and media can be stored on a digital device, e.g. they ask to view a photo that has been taken on a tablet</p> <p><b>Secure:</b> Pupils can name a range of digital devices in the home and at school. They can explain what the basic parts of a computer are used for, e.g. mouse, screen, and keyboard. Pupils understand</p>	<p>Pupils choose media to convey information from a selection. Pupils are aware that information can be public or private.*</p> <p><b>Developing:</b> Pupils understand that you can edit and change digital content, e.g. the appearance of text. They select media (e.g. images) to present information on a topic. They select basic options to change the appearance of digital content, e.g. making text bold. Pupils recognise what is personal information.*</p> <p><b>Secure:</b> Pupils can apply simple edits to digital content to achieve a particular effect, e.g. change the font of text for a reason. They combine</p>		<p>support to fulfil a task, e.g. taking a photograph, and create simple digital content.</p> <p>Pupils choose photos and sounds from a limited selection to convey information. They are aware that information can be public or private, and that some online content is inappropriate.*</p> <p><b>Developing:</b> Pupils choose a digital device from a selection to complete a specific task, e.g. to take a photograph. They select media (e.g. images, video, sound) to present information on a topic and understand that you can edit and change digital content. They recognise inappropriate content and know to tell an appropriate adult*</p> <p><b>Secure:</b> Pupils combine media with support to present information,</p>	<p>recognise patterns in groups of objects.</p> <p><b>Developing:</b> Pupils understand that we control computers by giving them instructions. They can identify and list steps of a known task in order, and understand that this is called an algorithm. They can input a short sequence of instructions to control a digital device.</p> <p><b>Secure:</b> Pupils can create a simple algorithm, and understand that the order of instructions is important. Pupils understand that computers have no intelligence and we have to</p>	<p>charts and tables, and understand why we use them. They collect simple data on a topic (eye colour, pets etc.) and use specific software to create simple charts. Pupils can explain information shown in a simple pictogram. They understand what personal information is and the need to keep it private*</p> <p><b>Secure:</b> Pupils can collect data and present it in a pictogram independently. They explain information shown in a simple chart, pictogram or infographic.</p>	<p>test out; predict the outcome of simple programs.</p> <p><b>Entering:</b> Pupils understand that we control computers. They can follow simple instructions to control a digital device, and recognise the success or failure of an action.</p> <p><b>Developing:</b> Pupils understand that we control computers by giving them instructions. They can input a short sequence of instructions to control a digital device. They try alternative approaches to achieve a goal.</p> <p><b>Secure:</b> Pupils understand what an algorithm is and they</p>

	<p><b>0.2</b>  <b>What is a computer?</b></p> <p><b>Entering:</b>  Pupils recognise a range of digital devices, and the basic parts of a computer, e.g. mouse, keyboard, screen.  They understand that you can access the same content on different devices and that information can be stored on a computer.  They can add text to a document using the keyboard (where appropriate).  Pupils understand that information and media can be stored on a digital device, e.g. they ask to view a photo that has been taken on a tablet.</p> <p><b>Developing:</b>  Pupils can name a range of digital devices in the home and at school.  They can explain what the basic parts of a computer are used for, e.g. mouse, screen, and keyboard.</p>	<p>Use technology purposefully to create, organise, store, manipulate and retrieve digital content.  Use technology safely and respectfully, keeping personal information private.</p> <p><b>CONCEPTS:</b>  Computer; software/application; personal information &amp; data; chart/pictogram; branching database; debugging</p> <p><b>KNOWLEDGE:</b> We can present data in different ways; why we use branching</p>	<p><i>Understand what algorithms are; how they are implemented as programs on digital devices; create and debug simple programs; use logical reasoning to predict the behaviour of simple programs.</i></p> <p><b>CONCEPTS</b></p> <p><i>Computer; algorithm ; program; sequence; debugging</i></p> <p><b>DECLARATIVE KNOWLEDGE</b></p> <p><i>An algorithm is a sequence of instructions that can be followed by a human or a computer to achieve a task; an algorithm inputted on a computer is called a program the order of instructions is</i></p>	<p><i>Use technology purposefully to create, organise, store, manipulate and retrieve digital content. Use technology safely and respectfully, keeping personal information private; identify where to go for help and support when they have concerns about content or contact on the internet or other online technologies.</i></p> <p><b>CONCEPTS:</b> What is a computer; hardware; software; input and output devices; creating content.</p>	<p><b>2.2</b>  <b>How do I create a multimedia story?</b></p> <p><i>Use technology purposefully to create, organise, store, manipulate and retrieve digital content. Use technology safely and respectfully, keeping personal information private; identify where to go for help and support when they have concerns about content or contact on the internet or other online technologies</i></p> <p><b>CONCEPTS:</b> Computer; software/application; creating &amp; editing content; animation; multimedia - text, image, audio, video;</p>	<p><b>Simple drawing programs</b></p> <p><i>Recognise that an algorithm is a sequence of precise instructions that a human or computer can follow to complete a task. Create simple programs using online programming applications by planning out an algorithm first. Debug and predict the outcome of programs in more than one application.</i></p> <p><b>CONCEPTS</b></p> <p><i>; Computer; algorithm ; program;</i></p>

<p>Pupils understand that you can find information on a familiar website, and use a simple password when logging on.*</p> <p>They understand that you can share digital content. <b>Secure:</b> Pupils recognise and use a range of input and output devices, e.g. mouse, keyboard, microphone / printer, speakers, monitor.</p> <p>They recognise that a range of devices contain computers, e.g. washing machine, car, laptop. They know where to save and open work and understand that work saved on a computer at school can be opened on a different computer or device.</p> <p>Pupils understand that you can use a search engine to find information using keyword searches.</p> <p>They remember a username and password for logging on, and understand that all devices, programs, websites, apps and games are designed and manufactured by real people to fulfil specific tasks.*</p> <p>Concepts: Machine Program Data</p>	<p>databases; key features of a branching database; what makes a good question; why we use computers; why we should be careful who we share personal information with</p> <p>SKILLS: Mouse &amp; keyboard skills; open and save documents; create a simple branching database; identify an object using a branching database; identify errors in a branching database</p> <p><b>Entering:</b> Pupils can identify an object by asking yes/no questions. They can recognise a branching database, and understand why we use them.</p>	<p><i>important; there may be more than one solution to a problem.</i></p> <p><b>PROCEDURAL KNOWLEDGE:</b></p> <p><i>Create a program to control a floor robot; plan an algorithm away from the computer then test out; predict the outcome of and debug programs.</i></p> <p><b>Entering:</b> Pupils understand that we control computers by giving them instructions. They can identify and list steps of a known task in order, and understand that this is called an algorithm. They can create a short sequence of instructions to control a device.</p> <p><b>Developing:</b> Pupils can create a simple algorithm, and understand that the order of instructions</p>	<p><b>KNOWLEDGE:</b> A range of input and output devices; why we use a computer to write; basic icons and where to find options in menus in word-processing software; where to open and save work at school; how to edit text and why we use particular effects (e.g. bold, underline); why we need rules when using technology.</p> <p><b>SKILLS:</b> Logging on; mouse skills - left, right, double click, targeting; keyboard skills - simple typing, basic keys; open and save documents highlight text and change appearance; insert an image</p>	<p><i>copyright; personal information</i></p> <p><b>KNOWLEDGE:</b> <i>What makes a good animation/photostory; why we use computers; where to open and save work at school; digital content is owned by the person who created it</i></p> <p><b>SKILLS:</b> <i>Use a camera/microphone/tab let to take photos or create an animation; mouse skills</i></p> <p><b>Entering:</b> Pupils select media (e.g. images, video, sound) to present information on a topic and understand that you can edit and change digital content. They recognise inappropriate content and know to tell an appropriate adult.*</p> <p>They understand that you can share digital content online.*</p> <p><b>Developing:</b></p>	<p><i>debugging; sequence</i></p> <p><b>DECLARATIVE KNOWLEDGE</b></p> <p><i>An algorithm is a set of instructions that can be followed by a human or a computer to achieve a task we use algorithms to help us plan programs ; the order of instructions in a program/algorithm is important and they should be clear and precise. Basic commands in Logo ( fd , bk , lt , rt , cs , pu , pd</i></p> <p><b>PROCEDURAL KNOWLEDGE:</b></p> <p><i>Create a simple program to control a sprite; plan an algorithm away</i></p>
---	--	---	--	--	--

	<p>They can distinguish between text, image, video and audio content. They understand what personal information is and the need to keep it private*</p> <p><b>Developing:</b> Pupils can create a branching database using pre-prepared images and questions. They can identify an object using a branching database. They can recognise an error in a branching database. Pupils understand that you can find out information in different formats, e.g. text, video, audio.</p> <p><b>Secure:</b> Pupils independently</p>	<p>is important. They can debug an error in a simple algorithm or program, and predict the outcome of an algorithm or program. Pupils understand that computers have no intelligence and we have to program them to do things. Pupils can create a simple program e.g. to control a floor robot.</p> <p><b>Secure:</b> Pupils understand that instructions need to be clear and unambiguous in an algorithm. They can evaluate the success of an algorithm</p> <p><b>Online Safety Links:</b> <a href="#">L2: Choosing what to do online</a></p>	<p><b>Entering:</b> Pupils understand that you can edit and change digital content, e.g. the appearance of text. They select basic options to change the appearance of digital content, e.g. making text bold. They select media (e.g. images) to present information on a topic. Pupils recognise what is personal information and can describe what makes a good friend.* They recognise inappropriate content and know to tell an appropriate adult.*</p> <p><b>Developing:</b> Pupils can apply simple edits to</p>	<p>Pupils combine media with support to present information, e.g. images and sound, and select basic options to change the appearance of digital content. They understand that digital images belong to the person that first created them.* Pupils understand what personal information is and the need to keep it private.* They know who to tell if concerned about content or contact online.*</p> <p><b>Secure:</b> Pupils plan out digital content and present ideas and information by combining media independently. They apply edits to digital content to achieve a particular effect. They talk about what makes digital content good or bad and edit it to improve it. They understand that the digital content we</p>	<p>from the computer then test out; predict the outcome of and debug longer programs.</p> <p><b>Entering:</b> Pupils understand that we control computers by giving them instructions - an algorithm. They can identify and list steps of a known task in order, and create a short sequence of instructions to control a device. They can recognise if a program is successful.</p> <p><b>Developing:</b> Pupils understand what an algorithm is and they understand that the order of instructions is important. They understand that</p>
--	--	--	---	--	---

	<p>plan out and create a simple branching database to identify a set of objects. They understand that the questions you ask when collecting data are important. They can evaluate a given branching database and suggest improvements. Pupils explain how different formats e.g. text, images, audio, communicate information and their benefits. They understand that our personal information belongs to us and why we shouldn't share it with everybody* They know who to tell if concerned about content or contact online*</p>		<p>digital content to achieve a particular effect, e.g. change the font of text for a reason. They combine media with support to present information, e.g. they choose images to accompany text from a selection. They save and reuse digital content found online, and understand that digital images belong to the person that created them* Pupils recognise what personal information is. and understand the need to keep it private* They know who to tell if concerned about content or contact online.* <b>Secure:</b> Pupils plan out</p>	<p>make belongs to us and others need to ask permission to use it*  <b>Online Safety Links:</b> <a href="#">S3: Communicating Online</a></p>	<p>computers have no intelligence and we have to program them to do things. Pupils can create a simple program e.g. to control a floor robot. They can debug an error in and predict the outcome of a simple program. <b>Secure:</b> Pupils evaluate the success of an algorithm or program. They identify and correct errors in a given algorithm or program. They understand that we can decompose a problem into smaller steps to make it simpler.</p>

<p><b>Secure:</b> Pupils use the keyboard confidently to type at a suitable pace, and can use common keyboard shortcuts, e.g. Ctrl + C (copy); Ctrl + V (paste). They create and use a strong password where appropriate. They organise their files using folders and appropriate file names.</p> <p><b>Concept:</b> Machine Logic</p> <p><b>Online Safety Links:</b> <a href="#">C3 Passwords</a></p> <p><b>Review:</b> <a href="#">Explain when to use forever loops (Y4)</a> <a href="#">Recognise selection in algorithms to alter what happens (Y4)</a> <a href="#">Recognise common mistakes in programs and how to correct them (Y4)</a></p>	<p>spreadsheets and what they do; not all data is reliable; how information is presented can be misleading</p> <p>SKILLS: Mouse &amp; keyboard skills; use technology safely and responsibly; use formulae in a spreadsheet to find out information; enter data into a spreadsheet and create graphs to present information</p> <p><b>Entering:</b> Pupils know that there is a difference between data and information. They can design a questionnaire and collect a range of data on a theme. They can enter</p>	<p>common errors in programs and how to debug them.</p> <p><b>Entering:</b> Pupils recognise that we can decompose projects to make them easier to plan and debug. Pupils can use infinite loops effectively in programs to control what happens, and combine them with selection to change what happens depending on if a condition is met, e.g. if...then...</p> <p><b>Developing:</b> Pupils decompose projects and plan out an algorithm for each part. Pupils can explain why we use selection in programs, and combine it with a variable to control game play.</p> <p><b>Secure:</b> Pupils can design their own programs and recognise the role sequence, selection and repetition have in determining the</p>	<p>SKILLS: Use a camera/tablet to record video effectively; editing video clips; adding titles, audio, effects to software; exporting a video</p> <p><b>Entering:</b> Pupils collect, organise and present information effectively using a range of media. They use more complex tools to edit and enhance media for a particular effect. They can rate a game or film they have made and explain their rating.*</p> <p><b>Developing:</b> Pupils identify and use appropriate hardware and software to fulfil a specific task.</p>	<p>decompose a program and write an algorithm for each part; test, evaluate and debug more complex programs.</p> <p><b>Entering:</b> Pupils create a program using a range of events/inputs to control what happens. They use selection in algorithms and programs, i.e. if... then... They can decompose a problem and create a solution (sub-routine) for each step. Pupils recognise variables in a program.</p> <p><b>Developing:</b> Pupils predict what will happen in a program or algorithm (e.g. change of output) when the input</p>

	<p>data in a spreadsheet and answer simple questions about information stored in a spreadsheet.</p> <p><b>Developing:</b> Pupils understand what a spreadsheet is and what it is used for. They use simple formulae in a spreadsheet to find out information from a set of data. They produce graphs from data in a spreadsheet and evaluate data and information shown.</p> <p><b>Secure:</b> Pupils understand that there are different tools for analysing data. They can collect, organise and present data independently in a</p>	<p><i>flow. Pupils can explain why we use variables in programs, and combine them with operators to make more complex games. They can explain common errors in programs and how to fix them.</i></p>	<p>They remix and edit a range of existing and their own media to create content. They recognise the audience when designing and creating digital content. Pupils know where to find copyright free images and audio, and why this is important.*</p> <p><b>Secure:</b> Pupils identify success criteria for creating digital content for a given purpose and audience. They evaluate their own content against success criteria and make improvements accordingly. They can explain why films have certain ratings.*</p>		<p>changes (e.g. via sensor, data or event). They create programs including repeat until loops. They create simple variables, e.g. to keep score or remove lives in a game and understand the difference and use if... then... and if... then... else... statements.</p> <p><b>Secure:</b> Pupils understand the difference between and use if... then... and if... then... else... statements. They combine a variable with relational operators (&lt; = &gt;) to determine when a program changes. They recognise the audience when designing</p>
